GEORGE A. BRUCE

PRESIDENT, KIWANIS CLUB OF WINNIPEG LTD., 1945

## *The President's Message*

It is a privilege indeed, on behalf of every member of our Club, to welcome you to our second annual Kiwanis Summer Show.

We believe that your pleasure and satisfaction in attending this show will be two fold. First, the enjoyment you will experience in the show itself, and second, the satisfaction you will have in knowing that your patronage is helping us very materially in reaching our Welfare Budget Objective for this year.

We have budgeted for an expenditure of over \$13,000.00 in Welfare Work, including the following very worthy projects: War Service Work (including our usual contribution of 1500 ditty bags for the men of the Merchant Navy), Rehabilitation Work (particularly directed to wounded veterans of this war), Country and City Relations Work, Camp Manitou, Fresh Air Camps, Children's Playground, Children's Clothing, Boys' Work, Children's Vocational School, Hard of Hearing Work, Girls' Work, and our General Welfare Fund. Strong committees from our Club members are actively engaged in these various projects, and your patronage here tonight is strengthening the hands of these committees.

Our sincere thanks to you for your patronage, and may I request that if you enjoy our show, you will take just a few minutes tomorrow to strongly recommend it to your friends.

Very sincerely yours,

GEORGE A. BRUCE,

President.

## **Manitoba Telephone System**

### ***WAR TIME DISCOVERIES UTILIZED IN POSTWAR HEARING INSTRUMENT***

Vast amounts of new data on hearing problems, coupled with advanced research in electronics, have resulted in a remarkable new hearing instrument.

This instrument—a completely new postwar model of the world-famous Maico Hearing Aid—introduces for the first time such unique features as separate control of high and low tones. This important technical advance permits more precise adjustment of the instrument to the user's individual hearing loss, so that all tones will come through clearly but without harshness.

Not only does this advanced instrument enable the wearer to understand conversation easily, but its wide tonal range permits enjoyment of music.

Much of the new information that was studied, analyzed and applied in developing the instrument was channeled to the Maico laboratories because of the company's unique position as supplier of 90% of the precision hearing test instruments used by Army, Navy, and civilian ear specialists.

Full information and test fittings may be obtained at the Maico office.

## Visit the Bay Historical Exhibit

A display of the relics from trading in Canada since 1670. Symbolical and interesting things from a pioneer and fur trade life that has passed. You'll find a thousand and one things to interest you even if you have a mild curiosity about other days and other ways. Everybody welcome—there is no admission charge.

FOURTH FLOOR, THE BAY
